

## WELDING TABLES WITH LIFTING FUNCTION

RELAXED WORK THANKS TO EXTRA FLEXIBILITY

### ADVANTAGES

The FÖRSTER lift welding tables are height-adjustable and can be comfortably moved into any working position.

The ideal prerequisite for an ergonomic workplace.

### PROPERTIES

FÖRSTER lift welding tables are equipped with an electro-hydraulic scissor lift substructure.

Covered with heavy-duty rails made of weld-spatter resistant special grey cast iron (GG) or a non-ferritic alloy (Al/Cu), these can take loads of up to 3.5 t.

For light loads we also offer a table with our X-Pro profile.

With all models, the table surface can be variably adapted to the specific requirement by removing individual rails.

Maximum flexibility is also offered by an optional under frame with adjustable feet to compensate for unevenness or for quick and easy transport.

**Highest quality, Made in Germany!**
